Osmosis Land

Earthsuit

Every night and every single day The sun will rise, the moon it will fade And in our web idols were spun Caught up in oblivion

So we come with the song, come with the sword Come with the image of the Son Come with the song, come with the sword What we behold we become

Living in osmosis land Living in osmosis land Come on and bring up, bring the swing Everybody get up Bring up, bring the swing, let my God erupt In this land of Osmosis Come on and bring up, bring the swing Everybody get up Bring up, bring the swing, let my God erupt In this land of Osmosis

I'm not the same as I ever was like the box of Pandora Never to be the duplicate of old forms of order Whenever the eyes seem to rip off and go I run to the flow, there's a stream for my soul Send me over, send me over I'm coming up out of the brick and the mortar To break up all of the disorder I want to become forever the essence of the Son Abide like the tundra in the Rain

Pride to the side Let the inner man crowd get up In osmosis land a bland house erupts Frequently injected sterilize eyes infected Noise rock on 'cause I ain't had enough

Migrate to the edge Earthsuits in a pile You'll never find the promise land while soakin' in the Nile I'd like to take a surge where I know I'll be not like Enoch And escalate

God above invade my soul I become what I behold
