

Friday Night

East 17

Got a cab, got my mates
Let's have some fun
On our way stop right here
This is the one
All the girls looking great
We'll have some fun
The night has just begun

Up the stairs first things first
Straight to the bar
Get messed up, get wasted
Jar after jar
I love it, love this life
This is the one
Dance till the rising sun

Everybody loves a night like this
It's a Friday night, no working shifts
And there playing all our favorite hits
And the night is young
Everybody loves a night like this
All our names are down on the guestlist
And we're going straight to the VIP
And the night is young

Saw this girl looking fly
She caught my eye
I'm hypnotized like a drug
She's my supply
And I think I'm in love
I'm on a high
The night has just begun

Make my way to this girl
I said to her
What's your name, here's my number
And with a flirt
She said to me with a smile
I think we'll work
Dance till the rising sun

Everybody loves a night like this
It's a Friday night, no working shifts
And there playing all our favorite hits
And the night is young
Everybody loves a night like this
All our names are down on the guestlist
And we're going straight to the VIP
And the night is young

Everybody loves a night like this
It's a Friday night, no working shifts
And there playing all our favorite hits
And the night is young
Everybody loves a night like this
All our names are down on the guestlist
And we're going straight to the VIP

And the night is young

Everybody loves a night like this
It's a Friday night, no working shifts
And there playing all our favorite hits
