

Little Eye

Elisa

Oh...

She says I'll let you be in your little world
like an angel she's leaving
but she's right I'm in my own world
just listening to my silence
there is a very hard violent thought
just fighting with my spirit
while I'm while I am
while I'm while I am
while I'm working every night
for you
for you

she says I'll let you be in your little world
like an angel she's leaving
but she's right I'm in my own world
just listening to my silence
there is a very hard violent thought
just fighting with my spirit
while I'm while I am
while I'm while I am
while I'm working every night
for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
for you

Little Eye you're half open
so you set me free 'cause I want to see
Little Eye you're half open
but you set me free 'cause I need to see
Little Eye you're half open
and you set me free 'cause I need to see you

while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
while I'm working every night for you
