

Little Do You Know

Elle Varner

I've been down, I've been showing my face
I've been laughin', I've been drinkin'
Just enough to cover up the pain
To maintain the illusion

Little do you know, little do you know
All of the lights are on, but no one's home
Nothings as it seems, seeing is believing
Lust is just a magic show
Little do you know

Momma said now you know
This ain't the first time
And it won't be the last
Still I feel you're the one that's gonna break me
To the point of no turning back

Little do you know, little do you know
All of the lights are on, but no one's home
Nothings as it seems, seeing is believing
Lust is just a magic show
Little do you know

That I can't stop thinking of you
I wish it was true
You're the only thing I wanna do
AND I can't stop thinking of you

Little do you know, little do you know
All of the lights are on, but no one's home
Nothings as it seems, seeing is believing
Lust is just a magic show
Little do you know

Little do you know, little do you know
All of the lights are on, but no one's home
Nothing is how it seems, wish it was a dream
Wake me from this reality
Little do you know, little do you know
Little do you know, little do you know
Little do you know, little do you know
Little do you know, little do you know
Little do you know, little do you know
