

## Night Song

Ellie Holcomb

Morning feels so far away, questions keeping me awake  
Will you sing, sing your night song?  
All these lies that are owning me, all this fear makes it hard  
to breathe  
Will you be, be my night song?

The truth that sings into my darkness  
The melody of love that leads me on  
The voice that comforts all my sadness  
Oh, even when the suffering is long, be my night song

Unmet longings steal my mind, calm my heart with your lullaby  
Will you sing, sing your night song?  
The sound of love surrounding me, promise that you will never l  
eave  
How I need, I need your night song

The truth that sings into my darkness  
The melody of love that leads me on  
The voice that comforts all my sadness  
Oh, even when the suffering is long, be my night song

Be my night song, oh, be my night song, oh  
Be my night song, oh,  
Be my night song, oh, be my night song, oh,  
Be my night song, oh, be my night song

The truth that sings into my darkness  
The melody of love that leads me on  
The voice that comforts all my sadness  
Oh, even when the suffering is long, be my night song
