

# Hit and Run

Elliphant

Everything feel different now  
Home is gone I can't find it now  
Kept it all in the inside now  
Next to my heart next to my love

I'm living in a bubble still  
Can't burst it man it's made of steel  
I'm kind of almost over you  
I'm just right under breaking through

Don't you remember  
Your hit and run  
Last December  
Don't you remember  
Your hit and run  
I'm just starting to recover

Don't move now one step closer  
See man I'm not whole yet no  
Just started to recover  
Just started to take cover

Cracking early at my show  
Doesn't matter I don't know  
Days are young and nights are old  
Should watch your step cause I'm not whole

Don't you remember  
Your hit and run  
Last December  
Don't you remember  
Your hit and run  
I'm just starting to recover

Don't move now one step closer  
See man I'm not whole yet no  
Just started to recover  
Just started to take cover

Don't move now one step closer  
See man I'm not whole yet no  
Just started to recover  
Just started to take cover

Eh, eh  
Don't up me  
Don't trick me

Don't you remember  
Your hit and run  
Last December  
Don't you remember  
Your hit and run  
I'm just starting to recover

Don't move now one step closer  
See man I'm not whole yet no

Just started to recover  
Just started to take cover

Don't move now one step closer  
See man I'm not whole yet no  
Just started to recover  
Just started to take cover
