## **Generation Of Innocence**

Many questions unanswered Contradictions is all we found All we have is a chaos Blind to visions and deaf to sound Generation of innocence Face the challange and fight Realize all your visions Set your spirit alive Go ahead full of confidence Trust your power inside Reawaken a common sense Now's the time to decide You'll be guiding the way In the labyrinth of our times Face to face with the future Minds are gathering to reunite Brave explorers of new horizons Tearing down barriers from the past Generation of innocence Face the challange and fight Realize all your visions Set your spirit alive Go ahead full of confidence Trust your power inside Reawaken a common sense Now's the time to decide You'll be guiding the way In the labyrinth of our times Through the passing bell of our times (Is) spreading fear through our hearts and minds now By the open gates of yesterday There is hope we'll see a golden age born Hear the heartbeat of nature Slowly beating in agony Now the pressure is rising high By the sins of society Generation of innocence Face the challange and fight Realize all your visions Set your spirit alive Go ahead full of confidence Trust your power inside Reawaken a common sense Now's the time to decide You'll be guiding the way In the labyrinth of our times
