

Soulmates

Embrace

I know you think this song's for you
You're on my list of three
Most have got a bellyful
But I've got all I need

We're soulmates, you and me
And we're soulmates, but underneath
I've been lonely, and you don't know what that means
Time will tell who's left behind
As you go your way [?]

My back is cold against the wall
There's nowhere left to run
From under us you pulled the floor
Now down for you is up

We're soulmates, you and me
And we're soulmates, but underneath
I've been lonely, and you don't know what that means
I might as well live up on Mars
For all the times we speak
Time will tell who's left behind
As you go your way [?]

We're soulmates, you and me
And we're soulmates, but underneath
I've been lonely, and you don't know what that means
I might as well live up on Mars
For all the times we speak
Time will tell who's left behind
As you go your way [?]
Time will tell who's left behind
As you go your way [?]
