

Between Us

Emma Drobná

I'm the best girl you could ever dream of love
You can never, never ever get enough
The kind of lovin' we are trying to provide
Between us, between us

I'm the best girl you could ever dream of love
You can never, never ever get enough
The kind of lovin' we are trying to provide
Between us, between us

I wake up and I want to talk
With my head up, yet my head is in a fog
Oh baby

Get to the ground, look to the past
I can hear all the sounds, walking fast
Flying high in the sky, two stories
Least you can do is to tell me that you're sorry

I'm the best girl you could ever dream of love
You can never, never ever get enough
The kind of lovin' we are trying to provide
Between us, between us

I know it's kinda hard for me to resist you but
We're bad news right before you even asked me out
Took me out to the middle of your favourite spot
Between us, between us

Next thing I know we are making out
Could not breathe but I also couldn't make it stop

Escaping reality for too long now
Least I can do is to tell you have a good life
Least you can do is to tell me baby goodbye
I'm the best girl you could ever dream of love

I'm the best girl you could ever dream of love
You can never, never ever get enough
The kind of lovin' we are trying to provide
Between us, between us

I know it's kinda hard for me to resist you but
We're bad news right before you even asked me out
Took me out to the middle of your favourite spot
Between us, between us

Never needed anyone to show me how to break the lines
Never needed anyone
A-one, a-two, a-three, a-four, a-five
Always think about the ones who bring the line to bring the sky
Always think about the ones

I know it's kinda hard for me to resist you but
We're bad news right before you even asked me out
Took me out to the middle of your favourite spot
