

# Long Way Down

Enchant

Dark day in paradise  
Tantalized by my eyes mislead  
This one you've got to see  
And her gaze, it is set on me

Not like I would push the brink  
But it sure makes me think

Maybe I need a change  
Otherwise would my eyes so stray  
A choice is taunting me  
And it knocks on my door today

Not like any vows were bent  
Just a glance, it's innocent

Long way down  
Don't you think you're too close to the edge  
Turn around  
Some wounds are so deep, they'll never mend

Take it from me, it's never worth the cost  
Been down that road before  
And demise is where it leads  
The grass looks emerald green  
But believe me, it's just the weeds

Not like I have crossed the line  
Owed her a lunch and a valentine

It's propagation man  
Don't you know that a guy has needs  
What separates us then  
From those things that are scratching fleas?  
Am I just a sounding board?  
Were you hoping for accord?

Long way down  
Don't you think you're too close to the edge  
Turn around  
Some wounds are so deep, they'll never mend

Take it from me, it's never worth the cost  
I just cringe thinking what I could have lost  
It seems you're looking for consent to do the same

Where's your memory? Don't you remember me?  
The weight of agony that crushed me flat  
Are you impervious or just too curious?  
Don't you remember what it did to the cat?

Guess what I did today  
Now I fear there's no turning back  
Hey, next time you need advice  
Check the zodiac

Not like I didn't warn

Buckle up, enjoy the storm  
Long way down  
Don't you think you're too close to the edge  
Turn around  
Some wounds are so deep, they'll never mend

Long way down  
Don't you think you're too close to the edge  
Turn around  
some wounds are so deep, they'll never mend

Long way down  
What's it gonna be, what's it gonna be, my friend?  
Turn around  
Some wounds are so deep, they'll never mend

Long way down  
What's it gonna be, my friend?  
Turn around
