

# The Sights

Enter Shikari

Are you staying awake for the liftoff, tonight?  
You'll never believe the sights tonight  
The sights tonight, the sights  
Are you staying awake for the liftoff, tonight?  
You'll never believe the sights tonight  
The sights tonight

Mr. Magpie  
You got distracted by the gleam of the diamonds, as you flew by  
But their dull glint does not impress  
When there's a billion stars in the sky  
I sit gripping my pen like a breadknife  
As I write, I'm leaving this Earth for the stars tonight  
And now I'm running to board the flight

Now I'll boldly go  
Into the great unknown  
Like Jean-Jacques Rousseau  
I give you my mind to be blown  
Now I'll boldly go  
Into the great unknown  
Like Marcus Cicero  
Well this life is whole

I'm searching far and wide to find a planet to orbit  
Far and wide, I wanna scan and explore it  
Far and wide, you're my new planet to orbit  
So fire up the rockets

Are you staying awake for the liftoff, tonight?  
You'll never believe the sights tonight  
The sights tonight, the sights  
Are you staying awake for the liftoff, tonight?  
You'll never believe the sights tonight  
The sights tonight, the sights

Now I'll boldly go  
Into the great unknown  
Unless I'm Jacques Rousseau  
I give you my mind to be blown  
Now I'll boldly go  
Into the great unknown  
Like Marcus Cicero  
Well this life is whole

I'm searching far and wide to find a planet to orbit  
Far and wide, I wanna scan and explore it  
Far and wide, you're my new planet to orbit  
So fire up the rockets

It's over now and I'm a little bit petrified  
Of what's to come, yeah my head's a bit stir-fried  
It's over now and I'm a little unqualified  
But fire up the rockets

(I'm searching) far and wide to find a planet to orbit  
Far and wide, I wanna scan and explore it

Far and wide, you're my new planet to orbit  
So fire up the rockets
