## **Beyond Belief**

Wisdom, knowledge, science

Develops, always, better, faster This is the final end

A voice in the wilderness Fights a futile war Because the strong are deaf More so then before

Massive disregard Shows what to expect Scars on top of scars Racing toward a future we don't have

Fear is taking over me, there is nothing I can see

The Future is as certain As life will come to an end When time feels like a burden We struggle with our certain death

Wisdom, knowledge, science

Develops, always, better, faster

We have to guide ourselves For we cannot stand One more false pretence getting out of hand

Now fear is the driving force Taking over us Aad finding out this source May turn out to be too much to bear

Fear is taking over me, there is nothing I can see How could this have come to be

The Future is as certain As life will come to an end When time feels like a burden We struggle with our certain death

Wisdom, knowledge, science

Develops, always, better, faster Defeats us

Science, knowledge, wisdom Destroys us, always, ever, faster This is the final end

Thirteen moons The path to walk Thirteen moons The path to talk Restore all that belongs to us

## **Epica**

Thirteen moons The way to speak Thirteen moons Is what we seek Restore all that was left behind

The Future is as certain As life will come to an end When time feels like a burden We struggle with our certain death

The Future is as certain As life will come to an end When time feels like a burden We struggle with our certain death

Wisdom, knowledge, science

Develops, always, better, faster Defeats us

Science, knowledge, wisdom Destroys us, always, ever, faster

This is the final end
