

Master Our Lips Are Sealed

Escape With Romeo

Lead me a oh master
to the universe next door
the next plateau
I was heading for

through pale phantoms of the past
and creatures from hell
I'll know there's a mystery ?
when I find the wishing well

master
our lips are sealed

lead me oh master
through that luminous life
where gods look like losers
and angels struggle for life

As the source of inspiration
I shall praise your name
so close to heaven
with nothing to loose and nothing to gain

master
our lips are sealed

sealed with open secrets
sealed with all the blood
sealed with the names of all the lovers
that vanished in the flood

master
our lips are sealed
