

# Digital Age

Esmée Denters

Growing up in the digital age  
Hiding behind a screen  
Instead of being face to face  
Addicted to likes and views  
It can be a dangerous game  
It's so easy to lose yourself  
When they've always got something to say...

When we're not satisfied  
Oh, just put a filter on it  
You know it ain't real life  
When we only share the good moments  
Is it really worth it, tryna be this perfect?  
We are so much more than we could ever capture  
With technology...

So turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do  
Turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do

Instead of staring at our phones  
Let's have a conversation  
And cancel out all the noise  
We don't need to try hard to fake it  
Striving for the unattainable  
When the flaws are what makes us beautiful  
Start Living in the moment  
Stop trying to save it

When we're not satisfied  
Oh, just put a filter on it  
You know it ain't real life  
When we only share the good moments  
Is it really worth it, tryna be this perfect?  
We are so much more than we could ever capture  
With technology...

So turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do  
Turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do

If we are so connected  
Why do I feel so disconnected?  
For a moment let's go back in time  
Back to when we used to talk for hours  
Felt like the world was ours  
Let's just pretend it's you and I...

So turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do

Turn all your devices off  
And maybe we could just talk  
And spend our time like we used to do

So just talk to me  
Remember how it used to be?  
Won't you just talk to me  
You remember how it used to be?  
Spend our time like we use to do, yeah
