

# What Made Us

Everlife

Do you remember how we laughed until we cried?  
We drove for hours singing Panic in the middle of the night.  
How many times did we cross the Kentucky line?  
You know we did some stupid things, but we turned out fine.

We won't forget those moments that made us.

We are the ones that will always stay the same  
As everything around us starts to change  
You are my constant, honey.  
We love what we do so we're doing what we love  
When I'm with you, you know it's enough  
You're crazy just like me, honey  
I won't forget these moments that made us.

That made us.

Cue the drums, kill the lights, yeah, we own that stage  
So much more than just a song that made us stay  
We gave it all we got because of what we had  
We would never do it different and take it back.

We won't forget those moments that made us.

We are the ones that will always stay the same  
As everything around us starts to change  
You are my constant, honey.  
We love what we do so we're doing what we love  
When I'm with you, you know it's enough  
You're crazy just like me, honey  
I won't forget these moments that made us.

That made us.

Love is what we are, we made it pretty far.  
(Love is what we are, made it pretty far)  
You take me as I am, I love you as you are  
(Take me as I am, love you as you are)

Love is what we are, we made it pretty far.  
(Love is what we are, made it pretty far)  
You take me as I am, I love you as you are  
(Take me as I am, love you as you are)

We won't forget those moments that made us.

We are the ones that will always stay the same  
As everything around us starts to change  
You are my constant, honey.  
We love what we do so we're doing what we love  
When I'm with you, you know it's enough  
You're crazy just like me, honey  
I won't forget these moments that made us.
