

Love Me Right

Exo

Oh Yeah! C'mon!

Take your time
For some reason, it's a heart pounding night (na na na na [x2])
So tonight
Let's run to the end of the moon (Yea Yea Yea Yea [x2])

Just right
Ignite your engine, step on the pedal
Everything is special
You and I look good together
Whatever you want,
Imma make it work (yeah)

Shawty, Imma party till the sun down
What is this mysterious feeling?
Come to me, hurry, before the sun rise
Wherever I am, me without you is a nobody (yeah)

On this highway, it's a runway
Your eyes that look into mine are the milky way
Just love me right
Baby love me right

Come to me, don't hesitate
You're alluring, you're my universe
Just love me right
My entire universe is you

Just love me right [x3]
My entire universe is you

Shine a light, run into the starlight
Past the milky way (na na na na [x2])
We can't stop

The moonlight that shines on us is always the same
I'm still lost in your orbit
I can do this all night long baby
Because wherever I am,
me without you is just half

A bright, moonlit night,
the stars give off their fireworks
Shall we fly a little bit higher (fly higher)

Feels like my heart will explode right now,
we're the only ones floating up
Leaving the earth behind,
below our feet, love me right

On this highway, it's a runway
Your eyes that look into mine are the milky way
Just love me right
Baby love me right

So come on baby, your dazzling and even more beautiful universe (beautiful 1

ady)
Just love me right
My entire universe is you

Just love me right
Just love me right (Can you love me right)
Just love me right
I just wanna make you love me
(My entire universe is you)

Even when countless nights come
In my sky, only you shine (woo yeah)
Whisper only to me
You and I color in the night sky

On this highway, it's a runway
Your eyes that look into mine are the milky way
Just love me right
Baby love me right

Come to me, don't hesitate
You're alluring, you're my universe
Just love me right
My entire universe is you

Just love me right (Oh oh oh yeah)
Just love me right
Just love me right (our own time)
My entire universe is you

Just love me right [x3]
(An electric Cosmic ride,
our own night time flight)
I just wanna make you love me

Yea (Woo You got to love)
Yea (You got to love me)
Yea
My entire universe is you
(my entire universe is you)
(You love me)

Yea (You love me)
Yea (You love me)
Yea
My entire universe is you
