

Nothing you say matters to us  
Nothing you say matters to us  
Fuck you

Spread your word this point of you  
And connect the machine  
Goddamned words, ocean of lies  
Taunting you to decieve

Nothing you say matters to us  
Nothing you say matters to us  
You are a virus spreading disease  
Your life is so sad spreading lies of hate  
Nothing you say matters to us  
Nothing you say matters to us  
Fuck you

So you'll seize up in your lies you  
Tell up at the site  
Sees you, signals and hate me to stand  
Me with your lies

You are a virus spreading disease  
Your life is so sad spreading lies of hate

Reap what you sow  
Your words are shit

You are a virus spreading disease  
Your life is so sad spreading lies of hate

Assume that you know my thoughts  
(All I want to do is see)  
Infect me with your disease  
(Tapping only on the keys)  
Change your face in front of me  
(Safe behind the cyberscreen)  
Wishing that you knew the truth  
(All I know is what I read)

Nothing you say matters to us
