

# Good Times

## Finger Eleven

Something has stuck in underneath my skin  
Eyes all looking in for something within  
Somewhere in here

Now everything I say gives this all away  
Senses deadened again  
Nothing lives today  
Not in here

Here in your head

Careful what you're feeling on the inside  
You should try to remember the good times and the high life  
Are you feeling alright?

Felt that I belonged  
And now I feel that gone  
Where it all went wrong  
I traced it all along  
Back here again

There was something calling me to negativity  
Dark covering me  
Shrouding every scene I'm cast in

Careful what you're feeling on the inside  
You should try to remember the good times and the high life  
Are you feeling alright?

Careful, when you're feeling, out of your mind  
You should try to remember  
The storm lines, in the spotlight, till you're feeling, all right.

Please answer  
I'm calling just to find out  
If you could be here for me when I crack  
The answer came  
I found it buried in the trash there  
I saw it stare...

Careful what you're feeling on the inside  
You should try to remember the good times and the high life  
Are you feeling alright?

Careful, when you're feeling, out of your mind  
You should try to remember  
The storm lines, in the spotlight, till you're feeling, all right.

Careful what you're feeling on the inside  
You should try to remember the good times and the high life  
Are you feeling alright?
