

Fall for You

Firefall

You can steal the night
And make it come alive
And the spark in your eye's a turn on
There's a chance I'll be
The next in line
Falling apart and left by the wayside

You come on like a vision in the night
Brighter than a shining star
Cast your light of love on me and we'll go far
Rock my heart like thunder
Your loving takes me under

Did you think I would ever fall for you?
Did you think you would ever fall for me?

Take me down for love
And put a spell on me
Let it become my soul's emotion
I'm a man who needs love
And a friendly kind
I can't get lost in love's illusions

You come on like a vision in the night
Brighter than a shining star
Cast your light of love on me and we'll go far
Rock my heart like thunder
Your loving takes me under

Did you think I would ever fall for you?
Did you think you would ever fall for me?

Did you think I would ever fall for you?
Did you think you would ever fall for me?
Did you think I would ever fall for you?
Did you think you would ever fall for me?
Did you think I would ever fall for you?
Did you think you would ever fall for me?
Did you think I would ever fall for you?

Did you think I would ever fall for you?
