

Polythene

Fischer-Z

We brought you new diseases
We brought you birth control
We brought you polythene
To wrap around your children when they're cold
We brought you new religions
We tried to save your souls
We brought you polythene
To wrap around your children when they're gone
Find yourself the highest mountain
Find yourself a voice that's sure
Who cares who came first or second
It's time for you to stop the third world war
We brought you grand solutions
We've seen it all before
We brought you polythene
To wrap around your children when they're gone
Find yourself the highest mountain
(No one talks anymore)
Find yourself a voice that's sure
It's time for you to stop the third world war
