

# The Sea of Tragic Beasts

## Fit For An Autopsy

Fall in the fire with me

Inescapable agony  
The rivers of ruin run deep  
The skill of savagery  
Only the alpha wolf claims the meat

Our path is carved with the cruelest cut  
Carnage consumes all we've ever loved  
The innocent blistered by the flame  
Trial by fire we burn in shame

These tragic beasts  
Suffer eternally  
The sad circus of humanity  
Remove your wings  
Rise from the sea  
And fall in the fire with me  
These tragic beasts  
Claw through the centuries  
Devouring the sons of sanity  
Remove your wings  
Rise from the sea  
And fall in the fire with me

Unnatural predators  
Insatiable hunt for the weakest prey  
Kill or be killed  
Violent will  
The flock is led astray

Our path is carved with the cruelest cut  
Carnage consumes all we've ever loved  
Lethal instincts sharpened sense of rage  
Fight or flight destroy humanity

Evolution through violence  
Defend yourself  
Thrown to the wolves  
They eat what they kill  
Not before I've had my fill  
Defend yourself

These tragic beasts  
Suffer eternally  
The sad circus of humanity  
Remove your wings  
Rise from the sea  
And fall in the fire with me  
These tragic beasts  
Claw through the centuries  
Devouring the sons of sanity  
Remove your wings  
Rise from the sea  
And fall in the fire with me  
Fall in the fire with me

There's a hole from here to hell  
Fall deep and find no peace  
In the sea of tragic beasts  
There's a hole from here to hell  
Retreat or fight for peace  
In the sea of tragic beasts
