

# Can't Exist

Flaming Lips

What I can't see, no I can't believe  
What I can't see, you know I can't believe  
It's only natural that I can't believe  
What I can't see

I've seen the birds fly  
Watched the crashing tide  
Talked a million miles away

I've walked through open fields  
Heard the words of those who kneel  
And I wondered how to steal your love  
But I never, never could believe in me

What do I gotta do to make you see me?  
What do I gotta do to make you see me?  
Should I lay down and cry or maybe I should just die  
'Cause I really can't exist if you don't see me

I really can't exist if you don't see me  
I can't exist if you don't see me
