## The Gash

**Flaming Lips** 

I run quickly behind that hell It's cruel and hurt me You feel me in sorrow To know that you're waiting for me

I like that, I know you like that Take my soul, do it. Just catch me, hide the light Just enjoy the pleasure Stop the time No doubts It doesn't matter to die

Look at me, take me If you like what you're seeing That's all what a want? It doesn't matter to die If in the end you will be mine Just do it Give me the eternity

Take my soul Take my body I know you want it Just do it!

Without a course, I'm coming to you Destiny whispers it to me And I know you're waiting for me I like that, I know you're observing me Come on take my soul, I know you're... I think about it, come on take my soul
