

## What Is the Light?

Flaming Lips

What is the light  
That you have  
Shining all around you?  
Is it chemically derived?

'Cause if it's natural  
Something glowing from inside  
Shining all around you  
It's potential has arrived

Looking into space, it surrounds you  
Love is the place that you're drawn to  
Looking into space, it surrounds you  
Love is the face that you're drawn to

Looking into space, it surrounds you  
Love is the place that you're drawn to  
Looking into space, it surrounds you  
Love is the face that you're drawn to

What is the light  
That you have  
Shining all around you?  
Is it chemically derived?
