

Outer Space

Freezepop

Alone in the moonlight
heading for nowhere
gone is the solar glare
don't follow me here tonight

run away, far away
run away, fly away

needing to find my place
something just feels wrong
knowing I don't belong
escaping to outer space

run away, far away
run away, fly away

unafraid
every mile
you fade
there are no delays
I won't look back (4x)
run away, far away
run away, fly away

oh so quiet here
caught in the milkyway
bound by the cosmic ray
i could just disappear

time will slow
no more earth below
another day to go
I won't look back (4x)
run away, far away
run away, fly away

alone in the moonlight
heading for nowhere
gone is the solar glare
don't follow me here tonight
don't follow me here tonight
don't follow me here tonight
