

## Fatalist

## Front Line Assembly

It's in my head now  
It's in my mind now  
It's in my face now  
It's in my brain now

City of mutants  
Darken then night  
Evil illusion  
Guided by light

The friends you thought  
They never were  
Egos and icons  
They just don't care

You hope to die quiet  
Laying in bed  
It's better than pointing  
A gun to your head

It's in my head now  
It's in my mind now  
It's in my face now  
It's in my brain now

City of mutants  
Darken then night  
Evil illusion  
Guided by light

City of mutants  
Darken then night  
Evil illusion  
Guided by light

All cold and forgotten  
You only feel pain  
This quest for hope  
Is a losing gain

Another dream crumbles  
In front of your eyes  
Your paranoid vision  
Only sees spies

It's in my head now  
It's in my mind now  
It's in my face now  
It's in my brain now

City of mutants  
Darken then night  
Evil illusion  
Guided by light

City of mutants  
Darken then night

Evil illusion  
Guided by light
