## **California Crossing**

## Fu Manchu

Twenty years or more
We had a plan
To build the finest street ride
In the whole damn land

Some dip down for keys
Some cheetah slicks
Leather bars and the holly
Just for kicks

Happenin' since the dawn of time Big block will shut you down, off the line In California, there is no stopping In California, the California crossing

We didn't know Couldn't foresee Cold blooded snake Building up heat

Tries to fly but it's no use Cobra's got the bird and it's loose In California, there is no stopping In California, the California crossing

In between runs
Through oil and smoke
Thought to myself
Did we ever choke?

Happenin' since
The dawn of time
Big block will shut you down
Off the line

Tries to fly but it's no use, it's no use There is no stopping California, the California crossing In California, there is no stopping In California, the California crossing
