

# Shine On

Gamma Ray

We drive, we drive, we're riding on through the universe  
We've come to reach our destination planet earth  
We come, we run, you cannot see us, flying in our  
spaceships, shooting 'cross the sky  
We explore and we all know what this is about  
for us all

So many light years we have travelled far from home  
Someday we'll be there I know

Shine on, Rising star  
We travelled such a long way  
But still you seem so far  
Shine on, Rising star  
for our belief in unity at heart  
Rising Star  
Come on and shine

Living was torture and dying release  
A declining world, no future, no hope  
We were passing the point of no return

So many light years, still we travel on and on  
And someday we will call you home

Shine on, Rising Star  
Diamond in the distance, still you seem so far  
Shine on, Rising Star  
Forever light the darkness in our hearts  
Rising Star, Rising Star

Salvation, Damnation  
We crawl across the sky with pain  
Forever we will fly

Out in the darkness  
There's a never ending light  
Still we are far away  
But we'll be there one day  
Someday we will call you home

Shine on, Rising Star  
We travelled such a long way  
but still you seem so far  
Shine on, Rising Star  
Forever light the darkness  
in our hearts  
Rising Star, Rising Star

Shadows in the darkness, so far away from home  
Standing all alone, no one there beside me

Shadows all around, so far away from home  
I know I'm not alone, it seems we're lost in space and time  
Shine on

Shine on now, and warm the tears

we've shared through years  
It's our prison, final reason for the freedom  
and the glory that we feel  
Are you for real?

Shine on, Rising Star  
Diamond in the distance  
Still you seem so far  
Shine on, Rising Star  
Forever light the darkness  
in our hearts  
Rising Star, Rising Star  
Shine on, Rising Star  
Come on and shine for us  
Shine on, Shine forever more  
Shine on, Our survival  
Rising Star, the last chance for us all  
The only hope for future and a home  
For us all  
For us all  
Come on and shine, Rising Star
