

Be My Light Be My Guide

Gene

I've been waiting a long time
So take me home, driver
Make me more wise
And tell me more about drinking
It's evil ways

And then I will be your friend
So please be my guide
Be my light can you really help me now?
I'm lost and there's no way out

When I was young, oh, my ma
She used to laugh at me and cry
"You'll be lonely when you die
Couldn't change it if you tried"

I've been home for so long now
So take me back will you
To the thrills of town
And tell me more about women
Yes, I had two last night

So can I be your friend now?
I've been waiting a long time
I've been waiting a long time now
Tonight, let it be my night
