

## Put A Light On

### Generational

This one wicked road  
You're gonna make it right  
You found your way to go  
You gonna take that right

You're gonna wait too long  
You're gonna wait till night  
You're gonna wait too long  
You're gonna wait till night

Was that the thing you heard?  
Was that the thing you said?  
I try to find the way  
Then maybe walk away!

The miles are way too long  
The skies are way too bright  
You know them way too long  
To run away tonight!

Don't need to fall  
The way that you go on tonight  
Cause the light on me and my blue skies playing  
The light on me and my blue skies playing

The sun will make them dry  
The sun will make them dry  
The sun will make them dry  
The sun will make them dry

This one wicked road  
You gonna make it right  
You found your way to go  
You gonna take that right

You're gonna wait too long  
You're gonna wait till night  
You're gonna wait too long  
You're gonna wait till night
