She Used to Say That to Me

George Strait

Let's take a rest Your kisses take my breath You are the best It's never been like this

She used to say that to me Over and over so sweet She'll tell you she'll never leave She used to say that to me

It thrills you so When she whispers soft and low "Please hold me tight I need your love tonight"

She used to say that to me Over and over so sweet She'll tell you she'll never leave She used to say that to me

"I'm yours," she sighs And she means it at the time But someday she'll go If you're wonderin' how I know

She used to say that to me Over and over so sweet She'll tell you she'll never leave She used to say that She used to say that to me Over and over so sweet She'll tell you she'll never leave She used to say that to me

She used to say that to me
