

# Lightning in a Bottle

Glen Campbell

Well I've never believed in the luck of the draw  
Or depended too much on faith  
But being with you makes a believer of me  
And I only hope it's not too late

All I have to do is catch some lightning in a bottle  
There's just one little miracle that has to succeed  
All I have to do is take a walk out on the water  
If there's only one chance in a million, to have you  
Well it's all I need

It's easy to care for someone like you  
But so hard to know just what to do  
So I'm saying a prayer, and I'm crossing my fingers  
How else do I make it all come true?

All I have to do is catch some lightning in a bottle  
There's just one little miracle that has to succeed  
All I have to do is take a walk out on the water  
If there's only one chance in a million, to have you  
Well it's all I need

Did you ever try to hold a dream in your mind  
And then waken to find  
The pictures fading in the shadows  
Like you were slowly going blind?

Well that's just how I feel, tonight leaving you  
I can't stand for the dream to fade  
If it makes me a fool, to wish on a star  
Then it's not the worse mistake I've ever made

All I have to do is catch some lightning in a bottle  
There's just one little miracle that has to succeed  
All I have to do is take a walk out on the water  
If there's only one chance in a million, to have you  
Well it's all I need  
Well it's all I need
