

Get You Stoned

Glenn Hughes

You live ten miles down a dusty road You gotta pull back, gonna
overload I make you sing like a mocking bird You better hurry
better hear my word

You are a wide receiver And you're magnificent A disbeliever, w
on't you let me vent

I gotta notion you will stay for a while I gotta potion gonna m
ake you smile

I can get you stoned You're in a roadside shack And you listen
to the grammophone I can get you stoned In your fantasy, you ne
ver have to be alone

You go to work on the graveyard shift I got the right thing to
give you a lift I see that you're ready and able You put your c
ards right out on the table

I come a knockin', won't you let me in Soul sister I want to be
gin I'm gonna take responsibility Before they take me to the hi
ghest tree

And it hurts so bad, you made the right choice And you're only
a groove away And when the morning comes I will be long gone, I
'm gonna make you feel I'm glad you make you feel that way
