

# Strive

Gloria Gaynor

You got your hopes up for a reason  
Now's the time to decide  
Don't you wait another season  
Get your sights up right before your changes pass you by  
Time goes on, the world keeps turning  
Make your move, aim for the top  
You make a difference, keep learning  
Put your best foot forward, you can make this kind of rock

You've got to strive, go for what you know  
Strive, don't give up on your dreams  
you've got to strive  
And let the world know you're really alive  
You've got to strive, go for what you know  
Strive, don't give up on your dreams

You've got to strive  
Let the world know you're really alive

You know the score, you know what's happening  
And don't feel sorry for yourself  
Roll up your sleeves, let's get to crackin'  
Shut your doubts up in the closet, leave your pity on the shelf  
Keep your nose onto the grindstone  
Faith in God will pull you through  
Load up your gun, get off your hindbone  
Fire at the target, hit the mark, oh why don't you?
