Extinct

God Module

We have come here
To be a part of nothing
To be a victim of violent circumstance
Stars collide and eons pass
But this animal cannot advance

Because they still believe in fairy tales
And every time their dogma fails
They just revise the parts they need
And claim it's what their god decreed

Oblivious
We are a soulless tribe
We can fuck and we can kill
It doesn't mean that we'll survive

Delirious
We are a warring tribe
We can fuck and we can kill
It doesn't mean that we'll survive

If I could prove to you
That this is all that you have
No life after death
If this is all there will ever be
Would you come back to reality?

If I could show you
That you are all that you have
No help to be had
If this is all there will ever be
Would you come back to reality?

You can hate me
But it will prove nothing
You claim your point of view
Does not need evidence
So blind to reason
You turn your back on truth
And praise your ignorance

Can you really call that morality
And still claim superiority?
Stars collide and eons pass
But this animal cannot advance

Oblivious
We are a soulless tribe
We can fuck and we can kill
It doesn't mean that we'll survive

Delirious
We are a warring tribe
We can fuck and we can kill
It doesn't mean that we'll survive

If I could prove to you

```
That this is all that you have
No life after death
If this is all there will ever be
Would you come back to reality?

If I could show you
That you are all that you have
No help to be had
If this is all there will ever be
Would you come back to reality?
```
