

Remember

God Module

Breathe in beneath the waves
The endless seas of our last days
And if you follow me
To where I wait for you

Do not resuscitate
Alive or dead it's still too late
There's nothing else
That you can do

Let the fire become light
Let the fire become light

Let the fire become light
Let the fire become star bright
Until there's nothing left of you
If my memories remain
If my memories can cause you pain
That's all I want them to do

Let the fire become light
Let the fire become light

Let the fire become light
Let the fire become light

Slip down behind the shroud
Desecrate this holy ground
There is no reason left
For you to try to fight

You used to be like me
There was a time we used to dream
Of standing side by side
While we watched the world end every night

Let the fire become light
Let the fire become light
Let the fire become light
Let the fire become light!

Let the fire become light
Let the fire become star bright
Until there's nothing left of you
If my memories remain
If my memories can cause you pain
That's all I want them to do

Let the fire become light
Let the fire become star bright
Until there's nothing left of you
If my memories remain
If my memories can cause you pain
That's all I want them to do

Let the fire become light
Let the fire become light
