

Beyond the pale before the dawn
Tell me your fears
While the angels sing along
Hide the moon inside the sun
The next transformation
Of our evolution

At the bottom of the deepest sea
This is where I take your memories
Infection spreading like a disease
Rotting away who you used to be

Forever lost
Never found
We exist in the frequencies of the unsound

Forever lost
Never found
We exist in the frequencies of the unsound

In the shadows you cast your doubt

Crippled by corruption
Disturbed and devout
Illumination catastrophe
An isolated incident of empathy

Can you create what will never be
Or simulate the cause of this insanity
Hallucinations mind control
I'm the new machine sent to steal your soul

Forever lost
Never found
We exist in the frequencies of the unsound

Forever lost
Never found
We exist in the frequencies of the unsound
