

Another Night

Graham Colton

We'd paddle out into the sun
Into the middle of the ocean
And we were watching all the birds
We were looking for the New World
And there was gold in the sky
And then we couldn't see the coastline
We were floating in the stars
We said we'd never make it this far

We can make another night
I'm awake a little while
We can make another night
Another night

They held each other through the night
And we would shiver in the moonlight
We believed in miracles
And we were calling out to Jesus
And for a moment we'd forget
We're gonna wake up back in your bed
We were living in a dream
Out in the middle of the blue sea

We can make another night
I'm awake a little while
We can make another night
Another night
Another night
Another night
Another night

We'd paddle out into the sun
Into the middle of the ocean
As close as we could ever be
In the middle of the blue sea
