

Where I'll Be

Graham Colton

You're growing through the sidewalk
Or blowing in the breeze
Burning like a wildfire
Or cold enough to freeze
Waking up the sunrise
Kicking up the dust
You were made to shine forever
I won't let you rust

Every road I'll be your guide
Taking you home or leaving it behind
When you feel tired I'll help you find sleep
And when you get home again
That's where I'll be

And when you're flowing downstream
And something's up ahead
Changing like the fall leaves
And make the ground a bed
Making up our own rules
It's us against the wind
We were made to run forever til forever ends

Every road I'll send you a sign
I'll carry you on
I'll stand by your side
When you feel quiet
When you wanna scream
Any place Anywhere

That's where I'll be
That's where I'll be
That's where you'll find me
That's where I'll be
That's where I'll be

I'll see you in the morning
In the golden light
I was made for you forever
I'll never leave your side

Every road and maintain we climb
I'll carry you on and stand by your side
If you get lost following dreams
Any place Anywhere
That's where I'll be
Any place Everywhere
That's where I'll be
