When Night Falls

Hell awaits at midnight Fires in the moonlight Thunder sound from everywhere Days of anguish and despair

Dark clouds in the sky In the streets people cry Hiding in the shadows There will be no tomorrow

All my saints are gone All my brothers lost their lives All my memories turned to blak Heroes fall and war is back

When night falls I die for you When night falls You'll die for me When night falls We die side by side Nothin can divide us When night is falling down When night falls

Towers at the dark horizon Gates will open, sun and rising A one-way ticket to hell Good bye to life, a las farewell

Trails of tortured victims Punished by te system Will never see the light of day Suicide is the only way
