

# Summertrain

Greyson Chance

Come with me for a little ride, see the shadows passing by  
Look at the sun and see the clouds turn to faces in the sky  
We've been awake all night, shattered dreams all around  
Close your sad, sad eyes we will be safe and sound

Come with me for a little ride, see the shadows passing by  
Look at the sun and see the clouds turn to faces in the sky  
Daydreaming lightly through the rain  
All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by  
Seems we are a thousand miles away from last night  
As you sigh in my ear, kiss the rain goodbye

Come with me for a little ride, see the shadows passing by  
Look at the sun and see the clouds turn to faces in the sky  
Daydreaming lightly through the rain  
All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by  
Come away with me, it's gonna be all right just breathe  
Come away with me, it's gonna be all right you'll see

And the windows are crying, but this train is flying us all through the rain, I fear  
And the sky is getting brighter with every mile  
And it all seems clear

Come with me for a little ride, see the shadows passing by  
Look at the sun and see the clouds turn to faces in the sky  
Daydreaming lightly through the rain  
All's forgiven on a summer train

Come with me for a little ride, see the shadows passing by  
Come away with me, it's gonna be all right just breathe  
Come away with me, it's gonna be all right you'll see

Come away with me, it's gonna be all right just breathe  
Come away with me, it's gonna be all right you'll see, you'll see

Come away with me
