Now to War

Guided by Voices

There is no boy in me now There is no time and I'm alone But I am only breathing - breathing around I get involved with your crowd They make me feel so alone If you could only see me when I'm around But this is you and this is war It makes me drink even more And I'll have fun then I'll make a mark on you I'll tell you all that I am How simple feet will walk for free Until you injure me again
