

I Can't Look the Other Way

H.E.A.T

All fired up and i know no limits
all the rules are lost and gone
here we come, got my motor running
cruising in the setting sun

turn on, tune in
turn up the beat and feel the power
turn up, begin
we'll drive into the starry night

to a galaxy of our own
down the streets were we all know
the night is never gonna end
until the sun is up again

through the dangers of the night

where the city shines so bright
i cant look the other way
when you go and let me down
the city knows just who i am
and i dont look the other way

fired up and there's no returning
speeding in the lightning lane
turning up and the music's burning
streaming from the turbo gain
