

Need Her

H.E.A.T

From a man to another
Down that same old street
It is a "Situation thunder"
In a full-full scale

Yeah I knows it's crazy but I still feel it
Been diggin, deep and down underground
Staring at the light of a night time ceiling
Moving at the speed of sound

Thinking bout her when I hear that song
Playing on the radio

I need her yeah I need her
Tell me what to do when my heart is out there
I need her if I leave her
Tell me what to do with my heart tonight

From a brother to another
Take a fools advice
And if you ever start to wonder
Man you don't think twice

Dancing to the rhythm of lovers healing
Knocking on heavens door
Masquerading into the night times feeling
Moving like the river flows

Turn around fast make no mistakes
How will I get her to know

I need her yeah I need her ...

Turn around fast make no mistakes
How will I get her to know
Thinking bout her when I hear that song
Playing on the radio
