

We're trying to get out of here  
And if we fail, we'll be left for dead  
The shroud crushes the atmosphere  
Like a virus - it will rot us

Our Earth, a running sore  
But still - we drill deeper and deeper  
Fighting our last war  
To survive - a world hostile to life

We're lost in ignorance  
Souls drenched in black  
Our world at combustion  
We burn ourselves in effigy  
And decay  
'cause ash won't wash our sins away

Possession becomes obsession  
That's what we're dying for  
That's what we're dying for

Our Earth, a running sore  
But still - we drill deeper and deeper  
Fighting our last war  
To survive - a world hostile to life

We're lost in ignorance  
Souls drenched in black  
Our world at combustion  
We burn ourselves in effigy  
And decay  
'cause ash won't wash our sins away
