

No Me Without You

Harem Scarem

Floating on this sphere
Counting down the time bombs clock
Everybody's under siege
Don't run into battle all alone

If I'm the dark
Then you're the light
Together I know we'll never fall

There is no me without you
There are no stars without the sky
There are no dreams to come true
If it ain't you and me forever

Our meaningless revealed
We're orbiting a soulless world
With fatalistic cheer
We're searching for a time long gone

If I'm the dark
Then you're the light
Together I know we'll never fall

There is no me without you
There are no stars without the sky
There are no dreams to come true
If it ain't you and me forever
If it ain't you and me forever

We'll just carry on
What didn't kill us made us strong
Now in the end I know what's true
There's no me, no me without you

There is no me without you
There are no stars without the sky
There are no dreams to come true
If it ain't you and me forever

There is no me without you
There are no stars without the sky
There are no dreams to come true
If it ain't you and me forever
If it ain't you and me forever
