

Space Ship Blues

Hawkwind

Take me up the skyways
And show me what you've seen
I want to cruse the universe
In your super space machine
Take me up the skyways
And show me what you've seen
I want to cruse the universe
In your super space machine

Before I could answer
The ship began to rise
I looked out of the porthole
And felt most peculiar inside

Take me up the sky-ways
And show me what you've seen
I want to cruse the universe

In your super space machine
In your super space machine
I want to cruse the universe
In your super space machine

Take me up the skyways
And show me what you've seen

I want to cruse the universe

I stepped inside the spaceship
And a voice said take a seat
Do you want to cruise the universe
Go where no one else has ever been

Take me up the skyways
And show me what you've seen
I want to cruse the universe
In your super space machine

I stepped inside the spaceship
And a voice said take a seat
Do you want to cruise the universe
Go where no one else has ever been

Do you want to cruise the universe
Go where no one else has ever been
Arching through the sky-ways oh zero in on me
