## **Don't Touch That Dial**

A suitcase is a nice place For a young man to come home

Then you got to know where

I wish I may, I wish I might Get a little sleep tonight

I am coming from.

Who me (Who me)

There just ain't no where to hang your hat from The wrong taste in the right place You got an image on your tongue. Something's wrong with the radio It's not playing the songs I know Trying to feel it ( Trying to feel it) Maybe (maybe) it'll come tonight.

Don't sing that song Unless you mean it You got to do it with a tear in your eye. Don't sing that song Unless you mean it Testify Testify

It's not a truck stop Not a roadblock That's gonna make you loose your mind It's the uncertainty of our day and time There's a foul smell in the hotel I think I'm gonna sleep outside Man you got to know you put us in a bind

Something's wrong with the radio It's not playing the songs I know I wish I may, I wish I might Get a little sleep tonight Who me (Who me) Trying to feel it ( Trying to feel it) Maybe (maybe) it'll come tonight.

Don't sing that song Unless you mean it You got to do it with a tear in your eye. Don't sing that song Unless you mean it Testify

I'm falling apart Breaking my f\*\*king heart Would someone let me know If they play a song I know

Trying to feel it ...

He Is Legend
