

There's no bright in a light
It's dragging me in down there, deeper
Conducting through this wrong track of life
I feel like now my time it's about to die

This day starts so dark
Awake it's hard I can't stand
Cause smoke embrace me
Wasting the breathing air
Contaminating everything
Everything, contaminating everything

This light isn't bright
It drags me down
It's getting darker and blurry

Tonight my nightmares will come true
But I'll enjoy 'til death takes me
Tonight is the time to lose it all, lose it all
Tonight is the night I'm falling down, falling down
No, why?

Take me for everything
Everything, I have been threw away was my choice
Love, life, friends, life, love
I see them all acting as somebody else
Like somebody they are not
Life it's mean to be
How do you want it?
If it means darkness
Why I would be a slave?
Everything, contaminating everything

This light isn't bright
It drags me down
It's getting darker and blurry

Tonight my nightmares will come true
But I'll enjoy 'til death takes me
Tonight is the time to lose it all, lose it all
Tonight is the night I'm falling down
Falling down, falling down
Falling down, falling down

Tonight is the time to lose it all, lose it all
Tonight is the night I'm falling down, falling down
I say why? I'm going to die
Why? Why?
I'm going to die
