

I Call Out Her Name

Herman's Hermits

Somebody help me I'm on my way home
I'm sick and I'm tired of this travelling alone
The girl that I left was to blame
But I can't forget her, I call out her name

She fooled me completely, then I realised
She spent all my money, too late I got wise
I walked out and caught the first train
But I can't forget her, I call out her name

She's a no good woman, now it's plain to see
But I can't get her off my mind, that's what bothers me
Last night I got drunk and I staggered to bed
But I couldn't sleep for the pain in my head
I know it's gonna happen again
Cause I can't forget her, I call out her name

She's a no good woman, now it's plain to see
But I can't get her off my mind, that's what bothers me
Last night I got drunk and I staggered to bed
But I couldn't sleep for the pain in my head
I know it's gonna happen again
Cause I can't forget her, I call out her name
